SUMMARY

Aspiring **Azure Data Engineer** with hands-on experience in building ETL pipelines, data ingestion workflows, and cloud-based data solutions. Skilled in Azure Data Factory, Azure SQL, and data transformation. Strong foundation in Python and SQL for data processing and analytics.

EDUCATION

- MGM's College of Engineering, Nanded** Nov 2022 – Present
Bachelor of Technology in Computer Science | CGPA: 6.44
- Vishwanathappa Hurne Jr. College, Nanded** 2022
Higher Secondary Certificate (HSC) | 78.5%

EXPERIENCE

- Azure Data Engineer – Synergy Global IT Solutions** March 2026 – Present
Developed scalable web applications using Flask and JavaScript. **Offer Letter**
 - Building and managing data pipelines using Azure services.
 - Working on ETL processes for data ingestion, transformation, and storage.
 - Gaining hands-on experience with Azure Data Factory, Azure SQL, and cloud data solutions.

PROJECTS

- Azure-Sales-Data-Engineering** GitHub
 - Built a scalable cloud-based data pipeline on Azure to ingest, store, and process sales data from distributed sources.
 - Leveraged Azure Data Factory for data ingestion, Azure Data Lake Storage for centralized storage, and Azure Databricks for transformation.
 - Developed SQL-based analytics workflows to generate business insights from processed data.

- Sales Data Pipeline** GitHub
 - Designed and implemented an end-to-end ETL pipeline for processing e-commerce sales data using Python and SQL.
 - Applied data cleaning, validation, and feature engineering, and stored structured data in a relational database (SQLite).
 - Performed SQL-based analytics and built visualizations to generate business insights such as revenue trends and product performance.

- Digital Detox: Digital Well-Being Application** GitHub
 - Developed a Digital Detox and Mental Well-Being mobile application.
 - Built a cross-platform application using Flutter & integrated Firebase Authentication & cloud synchronization.
 - Designed scalable UI workflows focused on engagement.

TECHNICAL SKILLS

- Languages:** Python, C++, JavaScript, PHP
- Web & Backend:** Flask, MERN Stack, REST APIs, HTML, CSS
- Data:** ETL Pipelines, Data Transformation, Data Modeling
- Databases:** SQL (MySQL), MongoDB, Firebase
- Cloud:** Azure Data Factory, Azure SQL, Azure Data Lake, Cloud
- Tools:** Git, GitHub, Docker, Linux, Excel

CERTIFICATIONS

- Introduction to Data Engineering – IBM** (Coursera) Certificate
- Microsoft Learn Cloud Skill Challenge – Microsoft** Certificate
- Data Analysis with Python — IBM Developer Skills Network** Certificate
- Data Structures & Algorithms in Python – GeeksforGeeks** Certificate

ACHIEVEMENTS

- STAR Award** – Awarded the STAR Award of MGM College (2024).
- 1st Position** – Secured 1st Position in IoT Workshop by Technex, IIT Varanasi at MGMCE, Nanded.
- A Digital Detox Application Enhancing Mental Well-Being** Paper
Published in *IJARESM*, Volume 13, Issue 12, Dec 2025.
